Social Science Research

ICSSR- NERC, Shillong and Sikkim
University

ABOUT THE SEMINAR

EMERGING TRENDS AND INNOVATIONS IN TEACHER EDUCATION

Teaching has been one of the oldest and respected professions in the world. Teacher education is a program related with teacher proficiency and competence that would make them competent enough to face new challenges in the education. As per the National Council of Teacher Education Act, 1993, the teacher education is a programme of education, research or training for equipping them to teach at pre-primary, primary, secondary and senior secondary stages in schools and includes non-formal education, part-time education, adult education and corresponding education. The changing times as well as the requirements of the society have necessitated changes in the ways of teacher preparation. The teacher education aims at development of teacher as an instrument of social change. This high expectation of teacher education requires bringing in the educational innovations to bring reform and for overall educational development. Innovative strategies imply the development of new ideas which are disseminated and utilized.

The need for educational innovations has become acute. All innovations are ultimately directed at changing qualitative and/or quantitative factors of learning outcomes. The qualitative factors could be better knowledge, more effective teaching skills, teaching competencies, character development and values. The quantitative factors could be improved learning parameters such as test results, amount of skills or competencies developed, etc. The educational innovation, reform, change and improvement in teacher education results in the advancement or improvement of education system. This seminar aims to discuss, deliberate on the emerging trends and innovations in teacher education under following subthemes.

SUBTHEMES OF THE SEMINAR
